WEB DEVELOPMENT PROJECTS

Travel Easy

Created an application to help travelers maintain their trip plans by creating recommendations for hotels and the weather based on their search criteria.

- Collaborated with a team of 5 to create this custom-coded, engaging, web application using HTML5 and CSS3
- Personally contributed to both the front-end and back-end of this project.
- Developed the code for the Weather search and adjust the style for the final look of the app.
- Displayed the weather information from the fetch API to appear on our page and store the data in local storage using JavaScript
